PROJECTS / OPEN-SOURCE

PORTFOLIO | [LINK](#)

React.js, Firebase

My awesome Portfolio using React.

Challenges:

- Make it as it is, which I structure for it.
- At start, I created this portfolio using basic HTML & CSS. Then I want to convert it into Single Page Application. So, it's possible with React concepts like JSX, Router, etc.

REFERSION UI - PRICING | [LINK](#)

HTML, CSS, JavaScript

Tried my hands on this beautiful UI using HTML and CSS for sharp my styling skills. Also, it's a fully responsive website.

CALCULATOR-APP | [LINK](#)

HTML, CSS, JavaScript

Build a basic Calculator app using HTML, CSS and JavaScript.

The most basic operations that a calculator can perform are related to addition, subtraction, multiplication, and division, etc.

CERTIFICATIONS
